

Reports API Beta

Pricing

As part of the Free Usage Tier, you can create 10 reports per month per account (API key) for free. Generated reports are not limited in size and can fetch up to 13 months of data (maximum retention period for CDRs).

Grace period: The new pricing will go into effect on the 1st of March 2020, until then charges are not applied.

Charges are applied based on the quantity of requests and the volume of data retrieved as listed in the table below.

Resource	Price
POST Requests (create report)	0.04€ per request
Report generation	0.00001€ per CDR
GET and all other Requests	Free
Data Returned	Free

Pricing example:

Assume you create an SMS report to retrieve 1 day of data and this report contains 10,000 CDRs. If you still have some free reports left (e.g. you created 6 reports this calendar month so you can only create 4 more reports for free), then you will not be charged for this report. If you have already used your free monthly reports, then the total charge for this report will be the following:

$$\text{Charge} = 0.04\text{€} + 10,000 * 0.00001\text{€} = 0.04\text{€} + 0.1\text{€} = 0.15\text{€}$$

N.B. Even if the requested time period contains 0 data records, the per request charge of 0.04€ is still applied, i.e. a report containing 0 CDRs will still cost you 0.04€.
